DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Washisu (US 6393215 B1).

In reference to claim 1, Washisu discloses a vibration correcting optical device, comprising: a vibration detection unit, ref. 19a, that detects a vibration of the vibration correcting optical device and outputs a vibration detection signal corresponding to the vibration, col. 9 lines 34-37; a vibration state judgment unit that judges a state of the vibration of the vibration correcting optical device to be one of at least three states, based upon the vibration detection signal, col. 10 lines 6-11; an image vibration correcting optical system, ref. 52, that corrects an image vibration caused by the vibration of the vibration correcting optical device, col. 1 lines 55-61 and col. 14 lines 46-49; a drive unit, ref. 110, that drives the image vibration correcting optical system based upon a drive signal; a drive signal arithmetic operation unit, ref. 11, that calculates drive signal based upon the vibration detection signal and outputs the drive signal to the drive unit, col. 10 lines 26-31; and a drive signal calculation control that controls a method for calculating the drive signal adopted at the drive signal arithmetic operation unit in

Application/Control Number: 10/809,413

51,, 5511...51 1....551. 1....551.

Art Unit: 2851

conformance to the state of the vibration ascertained through a judgment executed by the vibration state judgment unit, col. 11 line 37 – col. 12 line 27.

In reference to claim 2, Washisu discloses wherein a reference value calculation unit that obtains through an arithmetic operation a reference value to be used as a reference in processing the vibration detection signal based upon vibration detection signal, wherein: the vibration state judgment unit judges the state of the vibration of the vibration correcting optical device based upon the vibration detection signal and the reference value; the drive signal arithmetic operation unit calculates the drive signal based upon the vibration detection signal and the reference value, col. 2 lines 40-53.

Conclusion

This is a continuation of applicant's earlier Application No. 10/347,689. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/809,413

Art Unit: 2851

the advisory action. In no, however, event will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Arthur A Smith whose telephone number is (571) 272

2129. The examiner can normally be reached on Monday - Thursday from 8:00 AM to

5:30 PM. The examiner can also be reached on alternate Fridays during the same

hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Judy Nguyen can be reached on (572) 272 2258. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
